OBJECTIVE

Motivated and detail-oriented Computer Engineering student with extensive experience in full-stack web development using the highly scalable MERN stack (MongoDB, Express.js, React, Node.js). Demonstrated expertise in creating responsive, user-friendly, and high-performance web applications through university projects and independent work, encompassing both front-end and back-end development. Possessing strong problem-solving skills and a deep enthusiasm for adopting and mastering new web technologies for the development and deployment of innovative, user-centric solutions. Seeking an opportunity to apply my talents in a professional environment and contribute to cutting-edge software development projects.

SKILLS

- **Programming Languages** : Java
- **Web Development** : React.js, Node.js, Express.js, HTML, CSS, JavaScript
- **Database** : MongoDB

EDUCATION

Bachelor of Technology (Computer Engineering) Vishwakarma University, Pune.	June 2021 - Present CGPA: 8.59
Class XII Narayana Junior College, Hyderabad.	June 2020 – May 2021 Percentage: 96 %
Class X (CBSE) Jawahar Navodaya Vidyalaya, Pokharapur, Solapur.	June 2018 – May 2019 Percentage: 94.8 %

ACADEMIC PROJECTS

Chat Application

Developed a robust and clean full-stack chat application using the highly scalable MERN (MongoDB, Express.js, React, Node.js) stack. The application enables users to create accounts, join chat rooms, and engage in secure, real-time communication with other users. Key features include user authentication, group chat functionality, and a responsive, intuitive interface that provides a seamless and interactive chatting experience.
